

Andrew H. Sutherland

QUANTITATIVE DEVELOPER · AI/LLM TOOLING · FRONT OFFICE SPECIALIST

92 Blake Road, London N11 2AL (+44) 07751 148806 andrew.h.sutherland@gmail.com

US / UK Dual Citizen

Experienced front-office quantitative developer and macro specialist. Delivery focused, I've worked in a wide range of roles across major banks and hedge funds. Currently a Technical Desk Quant at Tudor Investment Corporation, where I design and build a proprietary fixed-income analytics platform and develop LLM/agentic tooling for the desk. Expert in products across Fixed Income, Rates, FX and Equities, linear and vol.

EXPERIENCE

Technical Desk Quant

1/2026 – Present

Tudor Investment Corporation, London

Sole quant-developer on a \$2B AUM fixed-income desk (team of 4). Designing, building and maintaining a proprietary analytics platform, and developing LLM/agentic tooling for the desk.

- Designed and built a greenfield fixed-income analytics platform in C#, with Excel, desktop and web interfaces — 100% sole-designed, with strict architectural control.
- Platform covers curve-building, historical pricing, and a wide range of fixed-income analytics, with fast parallel computations enabling interactive tools.
- Developing in-house LLM/agentic tooling using the Anthropic API. Heavy user of agentic coding (Claude Code), which now drives the majority of new feature delivery.

Head of Pricing Analytics / Front-Office Architecture

11/2022 – 12/2025

Tudor Investment Corporation, London

Head of Pricing Analytics Platform (to 6/2025), then Head of Front-Office Architecture. Responsible for rebuilding the core pricing and risk systems at Tudor. Hands-on Quant/Developer, architect, team leader and project manager. Java (90%) with C# and Python.

- Driver and architect behind a multi-year modernisation of Tudor's pricing platform. Key components include distributable pricing models, record-and-replay parameters, and maximal transparency with feeds to Excel/Python and key applications.
 - Expert in curve-building (single and cross-currency), pricing and risk of swaps, basis swaps, vol products (swaptions/FX), fixed income.
 - Led team of 12 developers across Europe and US. Ran stakeholder groups, organised workflow, status reporting and project management. Kanban approach with long-term goals overlaid.
-

Lead Engineer, Macro Front Office

4/2018 – 10/2022

Balyasny Asset Management, London

Helped develop all key components in BAM's Macro post-trade pricing and risk platform, 'Turbo'. Modernised and industrialised a C codebase into an enterprise pricing and risk management system. Rates, Fixed Income & FX, C/C++/Python.

- Lead developer in a global team of 5–6. Functional lead of the Turbo workstream (global team of 9).
 - Led re-engineering projects for curve-fitting, market data distribution, and interest rate risk (forward-wave approach).
 - Personally rewrote core yield curve fitting code; added cross-currency support and built systems for automated curve fitting.
-

IT Business Analyst (contract) — MIFID II

2/2017 – 2/2018

UBS, London

Worked with trading businesses, front and back-office IT teams on MIFID II compliance.

R Developer / Business Analyst (contract)

5/2016 – 11/2016

Credit Suisse, London

Equity Risk Management — developing exposure tools for regulatory reporting using pandas-like R data tables.

Senior BA / Project Manager, Equity Finance IT

5/2014 – 5/2016

J.P. Morgan, London

Ran team to develop improved risk reporting for equity swaps business. (Java/Python)

Senior Developer, Fixed Income IT (contract)

4/2012 – 4/2014

Morgan Stanley, London

Front-office fixed income; re-engineered a substantial number of systems and created new functionality for cash traders.

Development Manager, FX IT

6/2006 – 1/2011

HSBC, London

Multiple roles over 6 years, from hands-on front office Quant/Developer (FX/Java) to running a team developing real-time FX risk reporting for the PB business. Lead architect for the new FX PB Margin Engine covering cash, forwards and vanilla options.

Partner, Project Manager

4/2003 – 6/2006

Vichara Technologies, London / Delhi

Finance-focused IT consultancy. Oversaw multiple development streams with 40+ staff in India. Clients included banks, hedge funds and service providers. Supervised 8–14 staff members.

Team Lead, Commodity Derivatives IT

8/2002 – 4/2003

Barclays Capital, London

Led a front-office team to implement exotic commodity derivatives pricing and booking framework.

Derivatives Trader

1/2001 – 8/2002

Citigroup, London

Trader of hybrid, multi-asset derivatives and structured products.

Quant / Developer, Interest Rates

6/1996 – 12/2000

Citibank / Salomon Smith Barney, London & New York

Responsible for Citibank London's exotic rates pricing and risk management system. Wrote major parts of all system components, from curves to models to user interface (C with Excel front-end).

TECHNICAL SKILLS

C# (.NET)	Primary language; greenfield analytics platform, Excel-DNA, desktop & web interfaces	Java	Large-scale systems; Spring Boot, Java 21, multithreading
C / C++	High-performance systems; STL, C++17, thread-safe design	Python / R	Analysis, automation; pandas, numpy/scipy, multiprocessing
LLM / Agentic	Anthropic API; in-house tooling, agentic coding (Claude Code)	Fixed Income	Rates, swaps, swaptions, yield curve construction, cross-currency
FX & Equities	FX forwards/options, delta-one, vanilla options, VaR	Leadership	Teams up to 12; stakeholder management, Kanban, architecture

EDUCATION

J.D. (Doctor of Law), 1995

University of Virginia, Charlottesville, VA, USA

B.A. Physics & Computer Science, 1985

Swarthmore College, Pennsylvania, USA
